

The Harman ShadowLight XL Gas Fireplace Insert

Enjoy the ShadowLight XL experience.

The Harman ShadowLight XL Gas Fireplace Insert

Experience the ambiance of a wood fireplace without the hassle.

A mere glance doesn't do the Shadowlight XL justice. The more you look, the more you appreciate the timeless details. Intriguing flames and glowing embers give the ambiance of a large wood fireplace while amazingly fitting into a small 21" high fireplace opening. The rustic hammered pewter face with traditional screened double doors is adorned with subtle laser designs. The Shadowlight XL is placed almost flush with the wall, which is ideal in any home.

Exclusive to Harman, the Shadowlight XL burner delivers an extraordinary flame that can be adjusted while the fire is burning. The dark brick firebox makes the fire even more natural and alluring.

Harman masterfully combines technology, durability and style by adding features such as:

12 Gauge Firebox: The thickest firebox in the industry, Harman bases its standards on durability and longevity. The Shadowlight XL is built to last a lifetime.

Burner Design: This unique burner gives optimum flames.

Log Set: The new and improved log set boasts intriguing flames and a glowing ember bed.
